SUMMARY:

I am a skilled **Python/Django** developer with 6 years of experience building scalable web applications. I boost staff/admin productivity through Wagtail CMS and Django admin customizations. I've built hundreds of REST APIs to connect distributed frontends/systems. I work with modern frontend tools like Htmx and Alpine.js for optimizing UI. I deploy software to AWS/Linux servers (manual + Docker) with GitHub Actions.

EXPERIENCE:

Remote Inning - Full-stack Developer - (Remote) - (July 2021 - Present)

- Collaborated with **international clients**(The Motley Fool, Open Tech Fund, and Urgent Action Fund) and maintained an **open-source software, Hypha**, improving its efficiency and security.
- **Improved user response rate** by implementing a multi-user feature with customizable permissions.
- **Boosted staff productivity by ~25%** through strategic updates to dashboards and an automated task list.
- **Reduce third-party costs** by developing an internal post-application system for budgeting, contracting, and invoicing.
- Modernized Hypha UI using HTMX, Alpine.js, and Tailwind CSS; fully customized it for the clients like Urgent Action Fund.
- **Trimmed development time by ~35%** by enabling the non-technical staff to manage content through Wagtail CMS.
- **Increased company sales** by implementing a reusable service plan grid with Wagtail snippets and tools.
- Improved site performance with **data caching, query optimizations**, and different **pagination styles**.

Eoraa - Python/Django Developer - (Remote) - (April 2020- July 2021)

- **Led the backend team** and built **hundreds of APIs** by focusing on development, security, and seamless integrations with the distributed system.
- **Set up CI/CD pipelines** and deployed the software on AWS, configuring a multi-environment system.
- Configured **AWS WAF, classic load balancer**, and related services to ensure a secure, maintainable, and scalable production environment.
- **Achieved a 10x reduction** in data migration time during the migration of a PHP-based web app to Django.

PROJECTS / INTERNSHIPS:

- Spoonshot - Intern - (May - Aug 2019)
Enhanced crawler and scraper performance by **10x**. Built a custom proxy manager to bypass ip blocks. Collaborated closely with the **data science team** to maximize the value of extracted data.
- **Google Summer of Code** - Intern - (May - Aug 2018)
Built Hydra, a CLI client for hydrus(Hypermedia REST APIs), using **Redis** as a graph datastore and OpenCypher for querying. **Dockerized** the tool and developed a minimal web UI.
- GPT Clone - Project
Built a lightweight **ChatGPT-style** interface with Django, Htmx, and **GPT4All** to explore **LLM** and **gen-AI**. Focused on backend **integration of LLMs** and prompt-based interactions.

SKILLS: Python, Django, Wagtail CMS, DRF, PostgreSQL, Git/Github, React.js, Next.js, JavaScript, jQuery, Alpine.js, Tailwind CSS, Htmx, AWS, Heroku, Docker, Linux, Bash, LLM, gen-AI

EDUCATION: Bachelor of Technology(CSE) - SMVDU - (2016 - 2020)
